RE: LAUNCH AND TRANSITION FOR DEWALT TRAK-IT® C6 FASTENERS (PINS)

We are pleased to announce that DEWALT Anchors and Fasteners will transition the Trak-It C5 concrete gas nailer to the new generation of the DEWALT Trak-It C6 gas nailer starting September 2024.

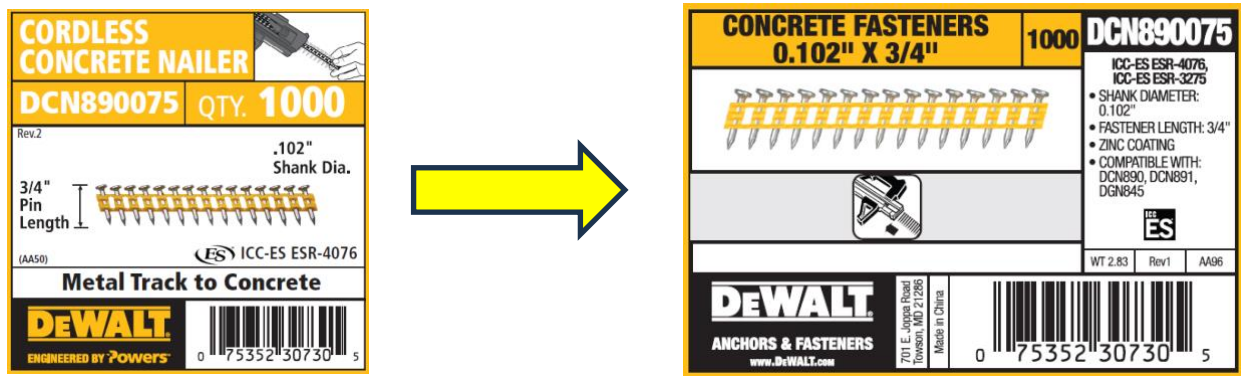

The new Trak-It C6 gas concrete nailer will accept pins from the Cordless Concrete Nailer (CCN) fastener collation.

Fasteners for the DEWALT Trak-It C6 and Cordless Concrete Nailer (CCN) share the same angled collation and are compatible with each other (see the table below for additional information).

- Performance of the fasteners in the DEWALT Trak-It C6 system are equivalent or better than the Trak-It C5 system.
- Fasteners from the Trak-It C5 system are not compatible and will not fit into the DEWALT Trak-It C6 system.

The ICC-ES reports show that DEWALT has testing and approval on all the tools mentioned with the fasteners:
[ESR-3275](#) Includes pins and performance for both Trak-It C5 & DEWALT Trak-It C6 gas-actuated systems (e.g. DGN845)
[ESR-4076](#) includes pins and performance for Cordless Concrete Nailer 'CCN' system (e.g. DCN890/DCN891)

LABEL TRANSITION: Current box artwork (shown on the left) and New box artwork (shown on the right)

Please see the following cross-reference pin chart TRAK-IT® C6 Pins:

TRAK-IT C6 / CCN PIN SKU	FASTENER TYPE	SHANK DIAMETER	SHANK LENGTH	ICC-ES APPROVAL	TRAK-IT C5 PIN SKU
DCN890075	Concrete	0.102"	3/4"	ESR-3275/ESR-4076	55310-PWR
