**RE: DEWALT UltraCon®+ Anchor Replacement Option for Powers Tapper® Anchor**

To Whom It May Concern:

The DEWALT UltraCon+ screw anchor is now available for consideration as a direct replacement option for the Powers Tapper+ screw anchor in concrete and masonry applications. Powers has been part of the GTS division of Stanley Black & Decker since 2012. As part of recent upgrades to the Powers Tapper+ line of concrete screw anchors, the decision was made to transition the line of product to the DEWALT UltraCon+ brand.

The DEWALT UltraCon+ is a one piece, small-diameter screw anchor available in 3/16" and 1/4" diameters and all current head styles offered by the Powers Tapper+. It is similar in appearance to the Tapper+ but is now identified with a "D+" stamped on the screw head, replacing the original "P+" stamp. The DEWALT UltraCon+ finish and color are similar to the Powers Tapper+, with Stalgard coating available in blue, silver, white and bronze color offerings.

The DEWALT UltraCon+ has ICC-ES building and residential code approvals for concrete (ESR-3068), masonry (ESR-3196), wood (ESR-3042) and chemically treated wood (ESR-3213) as well as recognition for the State of Florida (FL-29068) and with Miami-Dade County (NOA No. 21-0113.01). These approvals include comparative or better data at similar spacing and edge conditions, as well as new data at spacing and edge conditions not currently offered by Powers Tapper+. Please refer to the below tables for new load values of the DEWALT UltraCon+:
