**RE: DEWALT UltraCon® Family Phillips Flat Head to Star Drive Transition:  
UltraCon+, UltraCon, Aggre-Gator, UltraCon SS4, Crete-Flex**

To Whom It May Concern:

DEWALT Anchors and Fasteners will transition the UltraCon® family flat head concrete and masonry screw anchors from a Phillips Flat head to a star drive flat head. This user-preferred change will result in driver bit changes (Phillips flat head to star flat head) for installation. The change will cover all screw families named in the subject head.

A representation of the resulting change, along with important designations and identifiers of the DEWALT-branded product, are shown below. There will be no changes to any other product features (i.e., shank or thread diameter, overall length, thread length, color) or packaging quantities.

**All current approval listings concerning these screw anchors will see no change in design capacity allowances. Star flat head, Phillips flat head, and Hex head will all be included as accepted head style offerings in the approval listings.**

Phillips and star drive flat head offerings will coexist until Phillips on-hand inventory is exhausted. For reference, please see below tables listing current Phillips Flat head SKU numbers, and what will be the corresponding star drive flat head SKUs.

Again, as summary of the above content, refer to the below:

- *This change will have no influence on current diameter, length, color, head designations, packing quantity. **All critical design features remain the same.***
- *This change will not include a star driver bit packaged with the fasteners*
- *Current approval listings and design load values will see no impact*
  - *Ultracon+ / Ultracon – Florida State, NOA, ICC accreditations*
  - *Aggre-Gator, UltraCon SS4, Crete-Flex – Florida State, NOA accreditations*
- *This update will commence re-issued approval documents in accordance to the 2023 FBC. Phillips and star drive will both be included as accepted head styles for all approvals.*
- *Phillips head will discontinue once on-hand product has been exhausted, however will remain as an accepted head style in all approvals.*
